OBJECTIVE

An opportunity to assist health plans save up to hundreds of thousands of dollars and reducing the time to market from years of experience in the health care market and using many different technologies; recommending and implementing the best of breed applications for the company's budget, needs, and timelines.

EXPERIENCE

Architect/Developer

APS Healthcare, White Plains, NY

Architect for the BizTalk solution for HIPAA EDI processing across various versions starting with BizTalk 2000 to BizTalk 2004 and now on BizTalk 2006 R2. Created multiple interfaces with the backend systems Facets and CCMS. Created applications to handle non EDI interfaces to replace DTS packages to allowed expandability and flexibility into existing processes.

October 2006 – Present

Architect/Developer

Byram Healthcare, White Plains, NY

Implemented a real-time eligibility verification process that allows customer service representatives obtain status of patient's status while on the phone with them. Implemented across the United States and is used by all customer service representatives throughout company. Developed a proof of delivery application that retrieves signatures for shipped items for auditing purposes. Built a document storage application that has migrated seven years worth of images (Dr. notes, etc) to new document storage system.

March 2008 – Present

Architect/Developer

MDRxFinancials, New York, NY

Designed and built a data warehouse solution for Doctor prescription tracking. Created a series of validation components so the data sources that were being retrieved had a high rate of success making it to the warehouse.

Jun 2006 – Present

Architect/Developer

Medical Management Technology Group, Troy, NY

Developed interface for creation of transportation verification for the New York Department of Health. This is so that the state is able to accurately reconcile the trips that were paid for by New York Department of Health and the actual trips that were done by the various transportation companies.

July 2008 – Present

Architect

Arizona Healthcare Cost Containment System, Phoenix, AZ

Evaluated and recommended the steps necessary for the upgrade of Mercator 6.2 to the WebSphere TX version 8.1. Instructed employees how to execute the upgrade and provided support during the upgrade. Presented further optimizations to existing logic that is in the latest version of the product.

August 2008 – September 2008

Architect/Developer

Brinks, Hoffer, Gilson & Lione, Chicago, IL

June 2008 – Present

Certifications

Microsoft Certified
Technical Specialist

Mercator Core
Consultant

Created process to update Thompson system with notes, timesheets, and expenses from lawyers, administrative assistants using BizTalk to consume Word documents and post them to existing web services or update the backend tables directly.

Architect

March 2006 – October 2006

PacificSource Health, Eugene, OR

Designed and instructed offshore team on implementing non EDI interfaces to Facets. Instrumental in process improvement in project specifications and designing a blended shore model for reduced cost and quick turnaround for new interfaces.

Architect/Developer

March 2006 – May 2006

Secure Pharmacy Plus, Memphis, TN

Designed and built and instructed a full time employee on how to create a new electronic interface to pharmacy system using HL7 standards. New interfaces included a new patient, prescriber, order, and product objects for submission of data from state detention facilities.

Architect/Developer

March 2006 – May 2006

St. Vincents Hospital, Indianapolis, IN

Designed and built and instructed a full time employee on how to create a new electronic interface to pharmacy system using HL7 standards. New interfaces included a new patient, prescriber, order, and product objects for submission of data from state detention facilities.

Architect/Developer

March 2005 – December 2005

Blue Cross Blue Shield of Hawaii, Honolulu, HI

Architect for new implementation of QNXT where claim modification and message routing based on incremental roll over to the new system was being implemented. Main contact for all data related routing processes and procedures pertaining to claims processing using BizTalk.

Architect/Developer

February 2003 – September 2005

Arizona Healthcare Cost Containment System, Phoenix, AZ

Built the infrastructure for HIPPA processing for the State of AZ and HI healthcare transactions. All of the routing of message was implemented and was tasked with teaching full time employees on individual transaction transformations. Was given compressed timeline to be compliant, and reached the CMS deadline to avoid fines/fees.

Mercator Consultant/Instructor

January 2000 – September 2000

Mercator Corporation, Wilton, CT

One of six instructors teaching the Mercator suite of products. Specializing in both EDI and SAP implementation was assigned to teach advanced concepts and be on large implementation projects from manufacturing to healthcare to financial vertical markets.
